

Parvatha Varshini LS

SOC Analyst | Cybersecurity Researcher

🌐 p4rvatha.com | ✉ parvathavarshini03@gmail.com | 🌐 parvatha-cybersec | 📍 Manchester, UK

PROFILE

Cybersecurity postgraduate with hands-on SIEM and IDS monitoring experience across self-hosted Elastic and Wazuh deployments, including custom detection engineering mapped to MITRE ATT&CK and network intrusion analysis. Skilled at identifying and validating indicators of compromise from network traffic and log data. CompTIA Security+ certified and a consistent record of learning new platforms and tooling independently across each project built.

PROJECTS

Wazuh SOC Homelab: Cross-Platform Endpoint & IDS Monitoring

🔗 Wazuh, Suricata, Ubuntu, macOS

- Deployed and manage a manager/agent security architecture across Linux and macOS, configuring file integrity monitoring and IDS alert generation via Suricata, mirroring SOC log-monitoring and triage workflows
- Mapped custom detections to MITRE ATT&CK (e.g. T1046 via Nmap SYN scan) and documented solution design and delivery decisions in structured, reproducible write-ups

Elastic SIEM Homelab: Detection Engineering & Alert Triage

🔗 Elastic Stack, Docker, KQL

- Deployed and configured a self-hosted SIEM using Elasticsearch and Kibana (Docker) with Filebeat log shipping, ingesting 80,000+ log events to replicate core SOC analyst monitoring and triage workflows
- Simulated privilege-escalation and reconnaissance attacks mapped to MITRE ATT&CK (T1033/T1057, T1548); authored KQL detection rules and a Kibana dashboard to support alert investigation and tuning

TCP Port Scanner

🔗 Python, Sockets, Multithreading

- Built a multithreaded TCP port scanner in Python to enumerate open ports and fingerprint running services on target hosts, replicating reconnaissance techniques used in penetration testing and SOC investigations
- Implemented socket-based connection scanning with configurable timeouts and concurrent threads to improve scan speed, with structured output for quick identification of exposed services

EDUCATION

University of Manchester

Sep. 2025 – Sep. 2026

MSc Cyber Security

Manchester, UK

- Relevant coursework: Network Security, Incident Response, Malware Analysis, Cryptography
- Dissertation: Developing an Deobfuscation tool with Python (Ongoing)
- Extra-curricular: Accommodation Representative

SRM Institute of Science & Technology

Jun. 2025

B.Tech, Electronics & Communications Engineering

Chennai, India

- Graduated First Class (CGPA: 8.0/10)
- Relevant coursework: Computer Networking, Python Programming, Wireless Communications

SKILLS

Security Fundamentals : TCP/IP & network protocols, IDS/IPS log analysis, network segmentation, CIA triad, Cyber Kill Chain, MITRE ATT&CK mapping

SIEM & Detection : Elastic Stack (Elasticsearch, Kibana, Filebeat), Wazuh, KQL detection authoring, log correlation & alert triage

Security Tools : Wireshark, Nmap, Burp Suite, Suricata, Ghidra, Git

Offensive Security & Reverse Engineering : Penetration testing fundamentals, binary analysis (Ghidra), x86 Assembly

Cloud & Infrastructure : Microsoft Azure (VMs, networking, Log Analytics)

Operating Systems : Linux (Ubuntu, Kali), Windows, macOS

Programming Languages : Python, C/C++, Bash

Documentation : Technical writing, incident report authoring

EXPERIENCE

TATA GroupSep. 2024 – Nov. 2024

InternJaipur, India

- Supported monitoring and reliability of industrial control systems (SCADA/OT environments), gaining exposure to access and security considerations unique to critical infrastructure
- Collaborated directly with engineering teams to support secure operations, translating technical constraints into practical guidance for stakeholders

TechIndia Infoway Pvt. Ltd.Mar. 2024

Software InternChennai, India

- Developed an Android application integrating BLE-based IoT hardware using Android Studio, Figma, and Kotlin
- Worked within an R&D environment alongside cross-functional engineering teams, documenting solution design clearly for handover

CTF & COMPETITIONS

DEADFACE CTF 2025: Placed 17th among 700+ teams worldwide
UoM (Manchester Intelligence Society) x BAE Systems CTF: 3rd place
Cyber Leaders Challenge (CLC): Selected for Round 2 (national selection process)

CERTIFICATIONS

CompTIA Security+ (2025) | Microsoft Azure Fundamentals (AZ-900, 2025) | Google Cybersecurity Professional Certificate (2025) | HackTheBox CPTS (Ongoing)
